As the name suggests, Ultratint Boost is designed to increase the performance of factory privacy glass. Boost is made from an almost clear layer of high-tech metal oxide that will significantly raise the heat rejection performance of colour toned glass and boost its Ultra Violet protection level to 99%.

Ultratint Boost can also be fitted to clear glass where no noticeable change to the appearance of your car windows is a desired requirement. Boost will improve cabin comfort and protect you, your passengers and your cars interior from the sun's intense heat and damaging UV rays.

Ultratint Boost is electronic and signal safe, is protected by a scratch resistant hardcoat for increased durability and will provide many years of enjoyment and satisfaction.

PRODUCT PERFORMANCE SPECIFICATIONS

| PRODUCT CODE (NUMBER) | FILM COLOUR GREY | SOLAR ENERGY REJECTED | VISIBLE LIGHT TRANSMITTED (%T) | VISIBLE LIGHT REFLECTED EXTERIOR | SOLAR ENERGY ABSORBED | FILM THICKNESS (MIC) | VISIBLE GLARE REDUCTION | ULTRA VIOLET PROTECTION | ARPANSA PROTECTION RATING |
|--------------------------|---------------------|--------------------------|--------------------------------------|--|--------------------------|-------------------------|-------------------------------|----------------------------|---------------------------------|
| UTB75 (75) | NEUTRAL | 40% | 73% | 15% | 30% | 1.5mil | 26% | 99% | UPF50+ |

Benefits:
 Reflects intense solar heat
 Blocks dangerous UV Rays
 Reduces Interior Trim Fading
 Improves Cabin Comfort
 Controls annoying Glare
 Increases glass safety
 Looks distinctively stylish

Features:
 Soft, pleasing neutral colour tone
 High performance metal-oxide formula
 Signal-friendly with maximum UV protection
 Improves factory privacy glass performance
 Scratch resistant for enhanced durability
 Suitable for clear unrestricted viewing
 Whole of Life Ownership Warranty

HIGH PERFORMANCE AUTO FILMS

PRO
HI-PERFORMANCE
Professional Dyed-Metallised Autofilm

Featuring a dual construction of high performance metallised aluminium and colour impregnated black-graphite, Ultratint Pro blends supreme solar protection with sophisticated good looks.

Ultratint Pro's unique graphite colour tone captures the style of modern designer sunglasses. Pro combines superb optical clarity with optimum glare reduction, while preserving true colour perception. With enhanced heat rejecting properties, Pro improves cabin comfort and increases air conditioner efficiency. It protects you, your passengers and your car's interior from the sun's intense heat and harmful UV Rays.

Ultratint Pro is much more than just a stylish enhancement, it's a sound investment for the life of your car.

HIGH PERFORMANCE AUTO FILMS

MAX
MAXIMUM VANTAGE
 Signal-Friendly Hybrid Metal-Oxide Autofilm

Ultratint Max is the quintessential automotive window film.

It offers a dark smoke look with low reflectivity, strong solar performance, superior optical clarity and all without electronic or signal interference. Max's proprietary metal-oxide layer is formulated for enhanced solar heat rejection without compromising sensitive electronics, satellite navigation, GPS, T.P.M.'s and in-glass antennas.

Max's rich, smoke-black shade provides a desirable dark look that compliments all cars and additionally matches most existing factory tinted windows.

UltraTint Max sets the standard for value, styling and protection with maximum solar performance.
 The perfect compliment for today's modern car

ULTRATINT™

HIGH PERFORMANCE AUTO FILMS

ZERO
NON-CONDUCTIVE
Dual-Ply Zero Metallised Autofilm

Ultratint Zero is a premium quality dyed window film that is non-metallised and suitable for vehicles fitted with sensitive electronic devices. Zero's non-conductive formula will not interfere with GPS, Satellite Navigation, in-glass antennas, T.P.M.'s and other radio signal electronics.

Featuring a deep charcoal-black, non-reflective finish that compliments most car colours and provides an enhanced sports style look. Ultratint Zero additionally reduces heat and unwanted glare while providing protection from damaging UV Rays.

Zero's thicker dual-ply construction is matched with a protective hardcoat for increased durability and will provide many years of enjoyment and satisfaction.

SAFE
EXTREME PROTECTION
Metal-Free 4mil Safety Autofilm

Smash & grab theft, vandalism and increased crime have created a need for extra protection for vulnerable parked cars. Ultratint Safe is a thick, tinted safety laminate that helps hold broken glass in the event of attack or accidental breakage. It offers all the benefits of a standard automotive film combined with a thicker gauge layer and an aggressive adhesive for maximum strength. Safe is a signal-friendly, metal free product that is suitable for all vehicle types and is fully backed with a comprehensive lifetime warranty.

Ultratint Safe provides 24 hour, day & night - extreme protection.
